

Evansville Grain Site

East Exit Scale

After dumping grain trucks proceed to the exit scale that is equipped with:

- **Laser photo eyes** to verify the truck is completely on the scale
- **Message board** notifying them when the weight has been captured
- **Intercom** for communication to the scale office
- **Printer** that distributes scale ticket with load information
- **Smart truck pole** to capture the empty truck weight

SCALE: 1" = 125'

West Exit Scale

After dumping grain trucks proceed to the exit scale that is equipped with:

- **Laser photo eyes** to verify the truck is completely on the scale
- **Message board** notifying them when the weight has been captured
- **Intercom** for communication to the scale office
- **Printer** that distributes scale ticket with load information
- **Smart truck pole** to capture the empty truck weight

County M

East Dump Pits

Truck Probe

In bound trucks stop at this area first which is equipped with:

- **Smart truck pole** with an RFID antenna to read RFID tag
- **An intercom with photo screen** for the transporter to communicate with the scale office
- **Message Board** signifying when to proceed

Entrance Scale

Trucks then proceed to the entrance scale that is equipped with:

- **Laser photo eyes** to verify the truck is completely on the scale
- **Smart truck pole** to capture the truck's weight
- **Message board** will then display which pit to proceed to
