

Fall River Grain Site

Exit Scale

After dumping grain trucks proceed to the exit scale that is equipped with:

- **Laser photo eyes** to verify the truck is completely on the scale
- **Message board** notifying when the weight has been captured
- **Intercom** for communication to the scale office
- **Printer** that distributes scale ticket with load information
- **Smart truck pole** to capture the empty truck weight

Truck Pits

Truck pits 1 & 2 are for receiving grain
Truck pit 3 is for outbound grain

Truck Probe

In bound trucks stop at this area first which is equipped with:

- **Smart truck pole** with an RFID antenna to read RFID tag
- **An intercom with photo screen** for the transporter to communicate with the scale office
- **Message Board** signifying when to proceed

Entrance Scale

Trucks then proceed to the entrance scale that is equipped with:

- **Laser photo eyes** to verify the truck is completely on the scale
- **Smart truck pole** to capture the truck's weight
- **Message board** will then display which pit to proceed to

ENTRANCE & EXIT from Seier Rd.

North

Scale: 1"=100'
