

Landmark Services Cooperative is excited to announce that the new Fall River, WI and renovated Evansville, WI facilities will feature CompuWeigh's SmartTruck RFID technology.

How will it work?

1. Each truck will be given an RF badge which will hang from the passenger visor with a provided alligator clip. These tags have a 15' range so drivers will never need to remove them from the visor.
2. The badge is only tied to the truck because as we all know trucks can haul for multiple producers.
3. When the truck pulls up to probe station the driver will view the following information on the message board:
 - a. Truck ID: 473 CMT (license plate number)
 - b. Producer: Smith Farms (Will display whichever was the last producer this truck hauled for. If different driver will tell probe operator over intercom and it will be updated accordingly and displayed for driver to confirm)
4. Other information such as account split percentages and commodity will also be displayed at the probe.
5. Once probing has completed, truck will be told on message board to "Proceed to scale"
6. Truck will be identified by their RF badge on the inbound scale and weighed in automatically! Once weight is taken the driver will be told exactly which dump pit to proceed to on the message board.
7. After dumping, the truck will proceed to the outbound scale and once again will be identified by RF badge automatically.
8. Outbound weight will be taken and a ticket will print automatically at the outdoor printer. There will be a "re-print" button on the printer which will allow drivers to obtain multiple copies as needed.

What do I need to do to be ready?

1. Provide detailed information on every truck or tractor that you will be hauling into Landmark with. (Please see included RF badge request form for details)
2. We will then mail out your RF badges for each truck or tractor in the month of August 2014, which you will hang from your passenger visor when you receive them. The first time you arrive we will show you how easy the system is to use and we look forward to seeing you soon!
